III. Report Boundaries and Scope

(102-50,102-52,102-54)

The Company regularly publishes an annual ESG report to disclose the economic, environmental and social information concerning the Company's performance of sustainable development in the previous year (1/1 to 12/31). The report boundaries are set to cover the Company's entire operation in all 12 operating bases including the branch companies, headquarters, Good Finance Securities Investment Advisors Co., Ltd., and Good Finance PE Co., Ltd. This report is prepared in accordance with the "Core Options" of the GRI Standards. The information and statistics in the report are results of the Company's own calculation and investigation. The financial figures are based on the information audited, signed and openly published by accountants. All financial figures come in the unit of NTD.

This report is simultaneously published on the Company website for browsing, <https://www.goodfinance.com/>, as well as undergoing regular annual updates.

IV. Reporting Principles and References

The reporting principles and references include the core options for the GRI Standards edition of the Global Reporting Initiative (GRI), GRI supplementary indicators for the financial industry, code of practice for the sustainable development of listed companies, and guidelines for the compilation, production and filing of ESG reports by listed companies.

V. Report Verification

(102-56)

This report strives to disclose correct information, present it in a reasonable and appropriate manner, and comply with the international principles of disclosure by GRI Standards. This report has undergone limited verification by PricewaterhouseCoopers Taiwan.

Any information provided in the previous report has an impact reason for the recompilation: no recompilation.

(102-48)

Last ESG Report published: Issued in June 2021 (102-51)

Next ESG Report to be published: Scheduled for September 2023

Message from the Chairman

Chapter 01 | Message from the Chairman

(102-11,102-14,102-15,FS1)

Finance can be seen as the tree rings of human activities. A review of the financial history will reveal that people and the society are concerned about different issues in different periods of time, thus revealing the social value at the time.

As globalization is the norm today, the international community is getting more and more homogeneous with shared values that connect people around the world. Achieving a balance between the human society and nature with sustainable development is a paramount universal value in this global village today. Take a walk in New York and London, look at local consumer goods or dine in a café, and one will see signs of green energy, eco-friendly and sustainable declaration, sales and certifications everywhere. Sustainable development, much like freedom, equality and love, have become a universal value.

Finance and the Good Society written in 2012 by Robert J. Shiller the 2013 Nobel Prize for Economics has a considerable impact on Good Finance. It is acknowledged that finance has a major impact on the social development, and it is an industry that converge and diverge capital, which is like water on earth. Where there is water, there are possibilities for life. Likewise, capital brings about possibilities for opportunities, growth, development and innovation. The history of finance shows that creativity and capital must walk hand in hand so as to nurture magnificent vitality as seen from the Renaissance, Industrial Revolution and the software development in the west coast of the America.

As a chairman in a Taiwan-based financial enterprise, my responsibility is to create value for my shareholders. During the process, I discover that as long as our services and products bring more value to the society, we shall create more value for the shareholders. That is the positive cycle. So the next question is: what does the society care about now? What is the society concerned with? What does the society hold to be meaningful and valuable?

The previous misconception thought sustainability and profitability are on a collusion path or that sustainability is about doing a charitable deed. Many positive examples to counter the misconception have since emerged. As an investor with long-standing interest in value study, my finding is that the long-term thinking and expansive vision that are the focus of value

investment, if applied in sustainable green investments, will deliver great results. Sustainability is not an issue, but a built-in habit, attitude and way of thinking. It can be applied in all departments of all functionalities on all levels to embed long-term, balanced and sustainable value into our everyday tasks, inventories, strategies and initiatives.

Taiwan is an affluent society with a balance of NTD48 trillion in domestic deposits and a GDP per capita of USD36,051, ranking 36th in the world. Considering Taiwan's Purchasing Power Parity (PPP), our GDP per capita reaches USD68,730, ranking among the world's top 15. We have international top-notch companies like the TSMC. All this goes to show that the more resources and capabilities Taiwan possesses, the more responsibilities it carries. Good Finance is merely a small and medium-sized enterprise in Taiwan's financial circle. But we believe that by acknowledging the needs and values of our customers around the globe and offering them the best services and products, we shall become a better and more internationally competitive enterprise in due course.

In the past three years of corporate reform, we have established an ESG team, besides executing the daily tasks, to build relationships with home and overseas ESG circles, specialists, companies and start-ups. We keep a close eye on any investment, collaboration and business opportunities. We ask, Is there a next Tesla? Is there a next SolarCity? Is there a next TSMC? As a professional asset manager, we need to do a good job of protecting our customers' assets, managing their risks, while seeking more investment opportunities characteristic of our time. As my team and I have reached the above consensus, it's only a matter of time before we identify the next outstanding investment target in Taiwan, a world-class manufacturing hub. Given our recent years' success in transforming traditional enterprises in need of innovation, we keenly look forward to discovering more distinguished teams and companies for joint participation in international sustainable development.

Meanwhile, ESG is not entirely about energy and environment issues but also about knowledge and understanding. The aforementioned consensus on sustainability is evident among world leaders and cross-nation enterprises. But in reality, we are aware that it would require still much knowledge, theories, narratives and experiences for the general public to comprehend the vision and execution of sustainability. The same applies to financial quotient (FQ) among the Taiwanese. Taiwan is a wealthy country, but its citizens' average FG still lags behind many developed economies. We believe in knowledge and knowledge will spur the social development for the next few decades.

After more than a year of hard work, we were able to turn our internal publication originally for clients, Ta-Ching Bi-Monthly Journal, into a financial and business publication, 1611, in early 2022. Different from traditional publications of its kind, 1611 does not discuss stock or K-line data but aim to open up information that was previously reserved for the 1% lucky ones and share it with the other 99% of the people. The 1% lucky ones refer to the most resourceful group of the society, namely, those in possession of or with access to professional finance, financial management methods, business philosophies and values that will stand the test of time.

For the latest issue, the editorial team interviewed the team behind a UK-based forerunning organic business. In one of the previous issues, we covered sustainability related content regarding the practice of Effective Altruism by some American entrepreneurs. Through content editing, we meet with outstanding world talents in sustainable development and share our Taiwan-specific vision and experience, hoping that these encounters will one day turn into concrete partnerships. Knowledge sharing does not happen only within the Company but is open to many hundreds of our subscribers, investors and business owners with assets, and thousands of social media followers. This is not only to cultivate talents in green and sustainable finance within the Company, but also to consolidate sustainable values in concert with the society and establish a common language for the practice and the society. While staying aligned with international standards, this is essentially a practice of killing multiple birds with one stone.

Armed with knowledge, awareness, and feasible ideas, we open our five senses to seek out excellent teams, products and companies. We further internationalize our Company and partnering enterprises and take part in international competitions. We believe that Good Finance may be small in scale, but we are working hard nonetheless to contribute to a positive cycle of this sustainable financial ecology.

Chairman **Ku-Han Huang**

Stakeholder Engagement

Chapter 02 | Stakeholder Engagement

I. Stakeholder Identification and Communication

(102-40,102-42,102-43,102-44)

Good Finance has established the “Sustainable Development Promulgation Team” in order to promote the goals of sustainable development and corporate social responsibilities. The general manager of the Company serves as the convener of the Team, which consists of the heads of the brand department, the client partner department, the human resources department, the legal compliance department, the audit department, the risk management department, the finance department, the operation department and the technology department. With full discussion among the team members considering the importance, dependence and responsibility of the stakeholders to the Company, six groups of key stakeholders are identified: investors, employees, customers, the government & governing authorities, suppliers, communities & NPOs/NGOs.

With multiple clear communication channels, Good Finance and stakeholders both understand the major issues concerning the Company. The Company formulates countermeasures for the issues accordingly and incorporates them into the implementation of daily corporate social responsibilities. As we set out to meet the expectations of stakeholders, we expect to assume more corporate social responsibilities and establish a corporate culture that is pro sustainable development.

The Company’s primary communication channels are as shown in the table below:

Stakeholders	Communication channels and methods	Communication frequency	Key issues
Investors	Host shareholder convention	Annually	Company governance mechanism
	TWSE Market Observation Post Station	Intermittently	Profitability and management performance
	Published financial statements /annual reports	Regularly	Stakeholder engagement

Stakeholders	Communication channels and methods	Communication frequency	Key issues
Customers	Set up customer service hotline and mailbox	Intermittently	Service quality and customer satisfaction
	Organize forums and seminars	Intermittently	Maintain customer rights and interests
	Organize customer networking events	Intermittently	Financial education promotion
Government and governing authorities	Hold brokerage meetings	Intermittently	Company governance mechanism
	Maintain interaction with governing authorities		
Suppliers	Organize customer networking events	Intermittently	Response to environmental protection
Communities & NPO/NGO	Donation for charities	Intermittently	Charitable care
	Join charitable events	Intermittently	
	Join securities associations	Regularly	Enterprise volunteer
	Act for environmental protection	Intermittently	

II. Identification of material topics

(102-47)

During the process of stakeholder engagement, Good Finance has become aware of stakeholders' topic areas of concern and the level of their concern for each topic. Regarding the level of impact each topic has on the economy, environment and society, the Company's Sustainable Development Promulgation Team ranks and screens the topics based on their ratings. Five material topics to consider are eventually identified and categorized as such: Company Governance, Customer Concern, Employee Care, Environmental Protection and Social Participation. The identification results of each topic are shown in the diagram below:

Identification of material topics Matrix diagram (102-44)

Company governance

- 1. Management credibility
- 2. Guidelines for environmental and social issues
- 3. Company governance mechanism
- 4. Risk management
- 5. Profitability and management performance
- 6. Information disclosure
- 7. Stakeholder engagement
- 8. Law compliance

Customer concern

- 9. Digital services
- 10. Service quality and customer satisfaction
- 11. Maintain customer rights and interests
- 12. Customer data confidentiality
- 13. Service bases and channels

Employee care

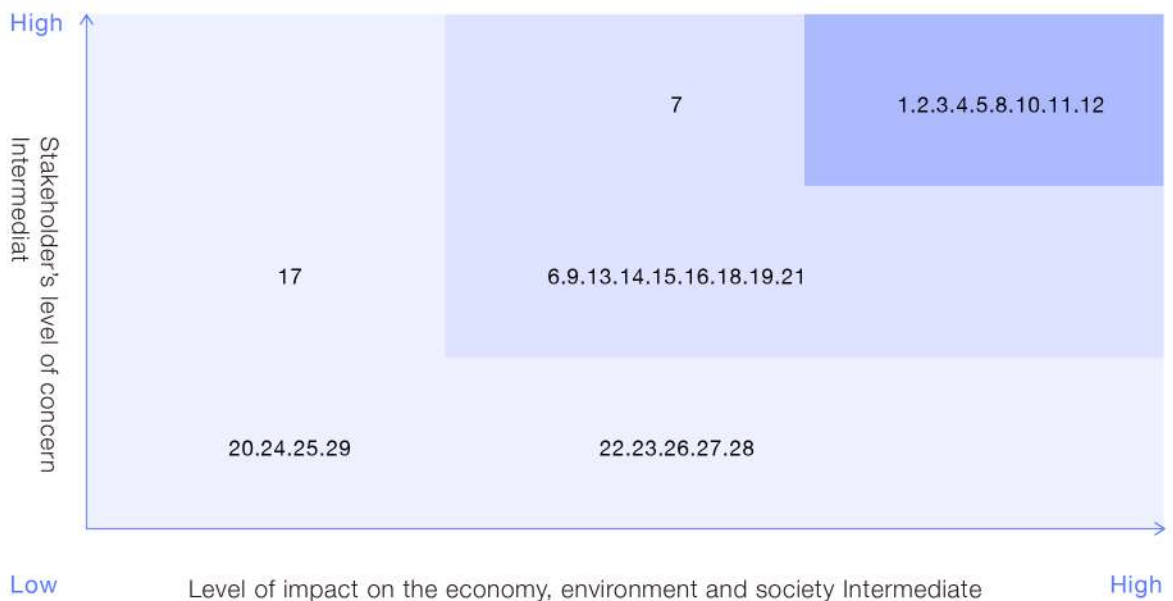

- 14. Remuneration and benefits
- 15. Employee education and training
- 16. Employee health enhancement
- 17. Employee communication
- 18. Respect human rights
- 19. Female employee care
- 20. Employee recruitment and diversity
- 21. Workplace safety

Environmental protection

- 22. Paper reduction
- 23. Management of energy use
- 24. Water resources management

Social participation

- 25. Charitable care
- 26. Response to environmental protection
- 27. Enterprise volunteer
- 28. Financial education promotion
- 29. Industry-academia collaboration

III. Major considerations of the GRI Standards

(102-46,102-47,103-1)

Employment recruitment and diversity	405 Employee diversity and equal opportunity	
Respect human rights	406 Non-discrimination	
Management of energy use / paper reduction	302 Energy	

Compared with the previous reporting period, there were no significant changes in the Company's organization nor in the supply chain, nor any information revision, nor marked changes in the boundaries of considerations and scope. (102-10,102-48,102-49)

3

Company Governance

Chapter 03 | Company Governance

(102-2,102-6,102-7)

I. Company Overview

Daqing Securities Co., Ltd., the former Good Finance, was founded in 1988. After years of stable growth, the Company became listed on a stock exchange in 2003, with its business scope covering securities brokerage, futures, proprietary trading, underwriting, bonds, new financial commodities and e-commerce. The subsidiary, Daqing Securities Investment Consultant Co., Ltd., was established in 2015 consisting of 12 operating bases to mainly serve the Taiwan region. The overseas business is limited to the scope of foreign securities trading markets designated by the governing authorities.

Prompted by the need of sustainable development, the Company's shareholding structure underwent significant modification in 2018 along with drastic reshuffle of Board of Directors. Also in 2018, Caterpillar Capital Co., Ltd. joined the Company with capital injection and a management team hoping that the new management team would reinforce the Company's financial technology and asset management business to break through limitations of conventional brokerage operation. The Company organization was also adjusted and added with the Chairman Office and the accounting department to meet the new demands of operation. In 2019, the Company set up the New Financial Product Department and transferred investment to Daqing's private equity subsidiary upon obtaining permission from the governing authorities in 2020. The Company was officially renamed Good Finance Securities Investment Advisors Co., Ltd. on January 26, 2022, after obtaining permission from the Ministry of Economic Affairs on October 29, 2021.

II. Short- and long-term development plans

(I) Short-term development plan

1. Brokerage business: to achieve inclusive finance and to provide customers with necessary and comprehensible market information, the Company has launched two services: 1. "Market Observer", at 8:10 a.m. on each stock market opening day, punctually rolls out push notification of market information with multiple integrated data. The idea is for customers to

become efficient market observers together with us. 2. "Stock Market Trading Column" near the end of each month presents a list of enterprises to watch out for, based on our market and financial reports. We hope to integrate knowledge and financial technology to solve financial challenges for more people and to embody good finance.

2. Proprietary business: our proprietary investment has reached NTD5.4 billion in market value after expanding the investment team, perfecting the research system and enhancing the capital allocation efficiency. Of the consolidated profit and loss of NTD604 million in 2021, the investment contributed as much as NTD483 million, which means the investment engine can effectively improve shareholders' capital efficiency.
3. Underwriting business: The Company's underwriting department has transformed into an investment banking department, providing the best services for assets and liability management for financial legal persons, corporate legal persons and legal persons.

(II) Long-term development plan (103-2,103-3,405-1)

To consolidate the market position of our brokerage business and accelerate technology construction and digital transformation, Good Finance will focus on wealth management that has growth potential and transform its business model to place equal importance on brokerage business and assets management. The aim is to build a financial institution with a long-term stable and profitable constitution and centered on long-term interests of customers.

1. Development of asset management business: the Company classifies the financial business into two categories: flow and stock, and brokerage is a business of flow, which is subject to the fluctuation of market trading volumes, but also fetches a huge customer base and data entry. The Company currently has NTD150 billions of customer assets, 200,000 account openings, 50,000 annual active customers, and 5,000 daily live transactions, all of which are rare, diversified transformation assets and an important foundation and entry for the development of stock business.
2. Technology investment: Technology is disassembling finance, and the future of finance is technology. Technology ushers in new possibilities for finance,

and the financial services that humanity needs are changing rapidly. Our goal is to leverage technology to improve brokerage customer satisfaction and enter the market of younger investors, as well as providing diversified investment channels for customers. We intend to provide customers with convenient and real-time order placement in the sector of traditional brokerage trading and advise on customized needs in the sector of wealth management.

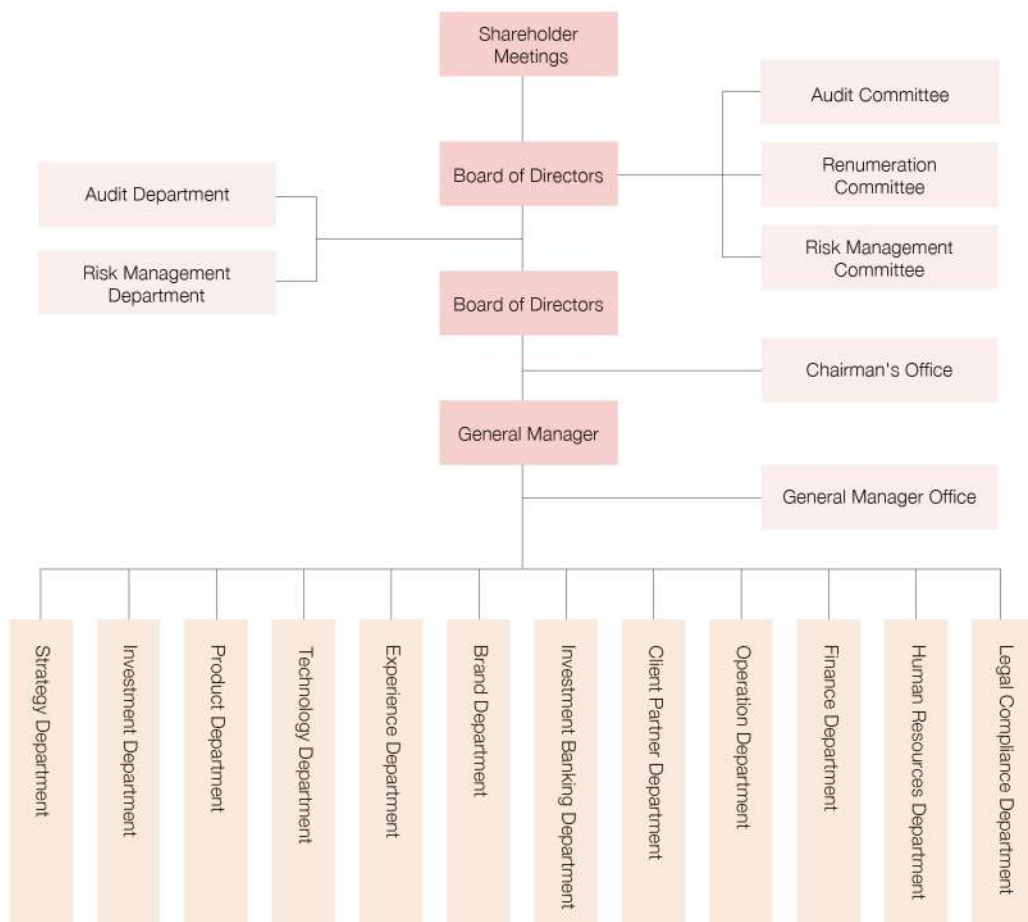

3. Recruiting cross-sector high-level talents: As the development of the securities market diversifies, digital finance is becoming an international trend, and the need for securities firms to recruit cross-sector talents is increasing in order to facilitate business transformation or boost competitiveness. As such, the Financial Supervisory Commission has, from October 2020 onwards, relaxed the relevant provisions of the guidelines governing the management of directors and business personnel of securities firms, and added the clause that people with more than 6 years of work experience and an excellent track record in such specialized fields as information, technology, law, e-commerce and digital economy may serve as a securities firm manager. In the past two years, the Company has continuously recruited over 100 outstanding cross-sector diverse talents to accelerate the Company's investment in financial technology and financial product innovation, with a view to soon become one of the most innovative financial institutions in the Taiwan market.
4. Revampment of current operating bases: In 2020, the Company's largest business sites, Fushun Branch Company and Taipei Headquarters, underwent a spatial upgrade and renovation, which will continue for other operating sites to explore more possibilities for providing a full range of financial advisory services and brand experience.

Key factors involved in building Good Finance into a sustainable company include understanding global and industry trends, leveraging core business expertise, adhering to integrity and credibility, and taking responsible and innovative actions to influence stakeholders within the scope of the Company operations. The Company strives to promote sustainable development that encompasses corporate governance, environmental protection and social inclusion, which will be implemented by all employees at the workplace and in everyday life. The

Company also pays close attention to domestic and international guidelines for sustainable development and changes in corporate environments to review, improve and modify the Company’s sustainable development system accordingly and to thereby enhance its effectiveness.

III. Company governance mechanism

(102-18)

Note:

1. Client Partner Department includes securities and futures brokerage business and branch companies.
2. Operation Department includes securities, futures and other back-end related settlement business.

3. Product Department includes financial commodities and technology products
4. Investment Banking Department oversees underwriting business.
5. We currently have 11 branch companies in Luzhou, Yangmei, Taishan, Kaohsiung, Miaoli, Zhongli, Keelung, Tainan, Taichung, Zhongho, and Fushun.

(I) The primary business of our subsidiary, Good Finance Securities Investment Advisors Co., Ltd., is as follows:

1. Accept commission to provide research, analysis opinions or suggestions on matters related to securities investment.
2. Issue publications related to securities investment.
3. Conduct seminars on securities investment.
4. Discretionary investment management.
5. Other securities investment consultation as approved by governing authorities.

(II) The main primary business of Good Finance PE Co., Ltd. is as follows :

1. General investment industry: investment in all kinds of sectors/businesses including agriculture, forestry, fishing, animal husbandry, industry, mining, commerce, service companies, securities companies, banking & insurance companies, trading companies, cultural business companies, construction of residential buildings, commercial building companies, recreation businesses and tourist hotels.
2. Venture capital: provide invested businesses with direct funds and advisory services on enterprise operation and management.
3. Investment Consultation: engage in the introduction, advisory and consultation of domestic and overseas investment excluding securities investment consultation.
4. Management Consultation: provide discussion and exploration of business management, consulting and related issues including business management consulting and venture capital business management consulting.

V. Profitability and management performance

(102-45,103-2,103-3,201-1)

A company's profitability and management performance are important indicators of the enterprise's sustainable development and also a major topic of concern to stakeholders such as shareholders and employees. For more than 30 years, Good Finance has used brokerage and margin trading and short selling as the first round of profit engines and has gradually built

more engines through the business reform: "Proprietary investment engine", "Financial product engine" and "Technology product engine". Each engine is built at a different speed and is yet gradually changing the Company's constitution and stabilizing its profitability. For example, shareholders' capital efficiency has been improved through the proprietary investment engine. For customers with fixed income needs, we launched the first self-produced, self-made and self-marketed asset management products. We hope to lay down the second cornerstone for the next 30 years of development to cope with the handling fees and the nature of market fluctuation.

Decent management performance will not only bring wealth to shareholders, but also create long-term value for the society. The management activities of Good Finance are planned and executed with customers' long-term interests at its core, adding value to the assets entrusted by customers, while generating revenue for the Company revenue and providing more benefits and care for employees. The Company values long-term over short-term profits and holds the view that the fundamental measure of success is how much long-term and beautiful value the team can create for shareholders and the society.

(I) The proportion of operating revenue of major businesses (FS6)

The list of operating revenue of major businesses and their proportion in the past 2 years is shown in the table below:

Unit: NTD 1,000

Project / Year	FY2021		FY2020	
	Amount	%	Amount	%
Brokerage Business	1,082,599	82.96	667,338	91.36
Proprietary Business	179,313	13.74	22,901	3.14
Underwriting Business	1,115	0.09	944	0.13
Futures Business	37,128	2.84	39,256	5.37
Other departments	4,872	0.37	0	0
Total	1,305,027	100.00	730,439	100.00

(II) Concise income statement (F\$6)

The concise consolidated income statement for the past two years (following the International Financial Reporting Standards) is shown in the table below:

Unit: NTD 1,000

Project / Year	FY2021	FY2020
Earnings	1,300,154	730,440
Expenses	(985,318)	(657,802)
Other profits and losses	38,121	53,801
Net profit before taxes	352,957	126,439
Net profit for the current period	320,987	105,648
Earnings per share (NTD)	1.05	0.34

(III) Dividends and related information

If the Company makes a profit over the fiscal year, it shall allocate no less than 1% as employee remuneration, which shall be distributed in shares or cash as determined by the Board of Directors resolution. No more than 1% of the aforementioned amount of profit obtained by the Company shall be allocated as remuneration for the board directors according to the Board resolution. The remuneration distribution for employees and the Directors shall be submitted to the shareholders' meeting report. However, when the Company still has accumulated losses, it shall retain the compensation amount before allocating the rest to the employee and Director remuneration in accordance with the aforementioned proportion.

If there are earnings in the Company's annual balance account, a specific amount shall be allocated first for taxes and compensation for previous losses. Secondly, 10% of the statutory surplus reserves shall be withdrawn, and the special surplus reserve shall be allocated in proportion to the provisions of the governing

authority. Additionally, after the special surplus reserve is listed or reversed according to the law, if there is still a surplus, it shall be consolidated to the accumulated undistributed surplus. The Board of Directors shall formulate a proposal for the distribution of the surplus and submit it to the shareholders' meeting for its resolution regarding the distribution of shareholders' dividends.

The Company's earnings and cash flow are predominately subject to the fluctuations of the economic cycle and therefore adopt a balanced and stable dividend policy in order to seek sustainable and stable business development. The future dividend payout policy is as follows:

1. The Company's dividend policy is mainly based on the considerations of capital needs, financial structure and surplus of the Company's future investments. The Board of Directors shall formulate an annual distribution plan based on the surplus of the fiscal year and authorize the Board of Directors to handle the matter upon resolution of the shareholders' meeting.
2. Considering a balanced and stable dividend policy, the dividend payout will be given in the form of stocks or cash wherever it is appropriate.

The earnings per share, dividends and other related information for the past two years are shown in the table below:

Unit: NTD 1,000

Project / Year		FY2021	FY2020
Earnings per share	Weighted average shares (1000 shares)	306,756	306,756
	Earnings per share	1.05	0.34

Project / Year		FY2021	FY2020	
Dividend per share	Cash dividend	0.00	0.00	
	Stock dividend	Stock dividend from retained earnings	0.00	0.00
		Stock dividend from capital surplus	0.00	0.00
	Dividends in arrears	0.00	0.00	
Remuneration of Directors		3,601,603	1,290,199	
Remuneration of employees		3,601,603	1,290,199	

VI. Ethical Management

(102-16,102-17,103-2,103-3, 205-2,205-3)

Good Finance adheres to the vision of "stable and steadfast, ethical and credible management", providing professional investment and financial services for the investors, while establishing a positive corporate reputation and profile with steady profitability. Anytime the Company employees commit any breach of good faith violation, corruption or any other illegal acts, they are damaging the rights and interests of customers and the Company operation. In view of this, the Company places great importance on corporate ethics, conducts operations with the highest ethical standards, and formulates the "Good Finance Securities Co., Ltd. Procedures for Ethical Management", which regulates all Company personnel from committing the following during the process of business execution: directly or indirectly providing, promising, demanding or accepting any improper benefits, or other dishonest acts that violate good faith or laws and regulations, or breaching fiduciary duties in order to obtain or maintain benefits.

Good Finance promises to advocate and instill in employees, on a non-regular basis, the importance of ethics and integrity, and caution them to stay vigilant and avoid any misconduct. Should any Company personnel be involved in dishonest behaviors, in addition to instructing the Audit Department to handle the inspection, a specially designated unit will

report such dishonest behaviors to the Board of Directors along with the handling methods and follow-up review and improvement measures. Should anyone commit dishonest and illegal acts to the Company, the Audit Department shall provide the relevant audit results to the Legal Compliance Department, which will notify the judiciary in accordance with its responsibilities. There were no incidents of any violations of the Procedures for Ethical Management and Guidelines for Conduct within the Company in 2021.

VII. Risk Management

Good Finance has stipulated risk management guidelines to improve the risk management mechanism for a sound development. Its primary goal is to keep the risks within the bearable range and ensure that the Company pursues maximum profits for the Company and maximum capital efficiency for the shareholders, besides achieving the goal of rationalizing risk and reward to establish a risk management system for each business based on the principles of independence, integrity, consistency, transparency, and immediacy.

(I) The organizational structure of the Company's risk management and the responsibilities at each level are as follows:

1. Board of Directors: The Board of Directors shall recognize the risks faced by the Company's operations, ensure the effectiveness of risk management, assume the highest decision-making role for risk management, and bear the ultimate responsibility for risk management.
2. Risk Management Committee: Formulate risk management policies and establish qualitative and quantitative management standards, as well as reporting the implementation of risk management to the Board of Directors in a timely manner and make necessary suggestions for improvement.
3. Risk Management Department: The Risk Management Department of the Company is subordinate to the Board of Directors and shall implement authority in the following capacity, plus the appointment and dismissal of risk management supervisors upon approval by the Board of Directors:
 - (1) Assist with formulating risk management policies
 - (2) Assist with risk limit and allocation for each department

- (3) Ensure the implementation of risk management policies approved by the Board of Directors
 - (4) Present timely and complete risk management reports
 - (5) Ensure that the business unit understand all details of each transaction in advance before the actual transaction and continue to monitor the holdings of the completed transaction
 - (6) As much as possible, improve the risk management measuring techniques for financial commodities with quantifiable risks
 - (7) Thoroughly understand the risk limit and application for each business unit
 - (8) Assess the Company's level of risk concentration and risk exposure
 - (9) Development and implementation of stress testing and backtesting methods
 - (10) Inspect business units' pricing model and evaluation system for financial commodities
 - (11) Other risk management matters.
4. Business units: Each business unit is responsible for front-line risk management, analyzing monitoring of relevant risks of its own units, formulating guidelines pertaining to risk management for each business unit, and ensuring that all business implementation complies with risk management guidelines and various laws and regulations.
 5. Audit Department: The Audit Department of the Company is an independent department subordinate to the Board of Directors and conducts regular audits of various business operations in accordance with the provisions of the internal control system.
 6. Legal Compliance Department: The Legal Compliance Department is responsible for the Company's legal risk management and compliance with various regulations.
 7. Finance Department: The Company's Finance Department is responsible for capital flows and maintaining the Company's funding liquidity.
 8. Science and Technology Department: The Company's Science and Technology Department is responsible for managing and maintaining the in-

house developed or eternally purchased systems and complies with relevant information regulations.

9. Settlement Unit: The Company's settlement unit is responsible for clearing and settlement, middle-end risk control within the department, compliance with the transaction law set out by the governing authority and reporting and compiling of operational risks.

(II) The primary risks faced by the Company are:

1. Market Risks: refer to the risk that the value of a financial asset may fluctuate due to uncertainty in market prices during a certain period of time, e.g., changes in interest rates, exchange rates, equity securities and commodity prices, and possibly result in losses for items on and off-balance sheet items. Therefore, the Company shall establish a sound management system for market risks and stipulate management indicators, setting indicator limits to effectively assess the exposure of market risks.
2. Credit Risks: refer to the possibility that customers or transaction counterparties (including securities issuers and contractual counterparties) fail to perform their obligations, and risks of losses to the Company's financial status as a result of such failure to perform the obligations. Therefore, the Company shall remain vigilant to the credit status of customers or transaction counterparties and stipulate credit management indicators to lower the risk of breach of contract and risk concentration.
3. Liquidity Risks: refer to the risk of failing to liquidate assets or obtain sufficient funds to fulfill due duties (referred to as "Funding Liquidity Risk") and the risk of significant changes in the market price when handling or offsetting the holdings due to insufficient or disorderly market depth (referred to as "Market Liquidity Risk"). The Company shall set concentration control indicators according to various businesses and financial commodities to reduce market liquidity risks; establish a funding liquidity gap analysis, set an indicator limit, and formulate a response strategy accordingly to prevent the occurrence of poor liquidity.
4. Operational Risks (including legal risks): Operational risks may arise from inadequacy or errors in internal operations, personnel and systems, or losses

due to external incidents, including legal risks. To reduce the huge losses resulting from operational risks that will affect the actualization of operational and management objectives, the Company shall follow the operational risk management mechanism to report risk management events and facilitate risk identification, assessment, surveillance and control in order to mitigate operational risks.

5. Climate Risks: Climate risks refer to the transformational risks pertaining to low-carbon transition due to climate change and impacting the Company finance, strategies, operations, products and reputation, as well as the physical risks to the Company finance and operations caused by the extreme climate due to climate change. The Company shall identify the correlation between climate risks and credit risks, market risks, liquidity risk and operational risk, and establish a climate-risks assessment and management mechanism for climate risks in order to reduce climate risks.

In order to establish a stable and effective method to manage risks regarding the market, credit, operation, and liquidity, each department shall formulate necessary risk management measures for its own department based on its business or product category, upon full consideration and effective management of the risk categories and sources. Risk management is about taking into consideration the possible impact of all combined risks from overall Company perspectives, as well as various financial and business guidelines that affect capital adequacy and capital allocation. Besides compiling and converging the needs and suggestions of each business unit, the risk management unit should comply with the principles of centralized risk management to establish a top-down management mechanism and hand it over to the business unit for reference and implementation.

Risk management is not only the responsibility of the risk management unit, but each business unit, in order to effectively control, manage and prevent the Company from bearing excessive risks, should adopt fitting strategies for risk avoidance, risk transfer or offsetting, risk control and risk assumption strategies in its daily business activities and management processes for effective risk management. The Risk Management Committee shall hold regular meetings and

report them to the Board of Directors along with the implementation of risk management status (as shown in the table below). The Risk Management Committee shall report qualitative data on risk management to the Board of Directors annually. Except for the approved standard contracts, all documents and contracts should be approved by the Legal Compliance Department before signing in order to control legal risks.

Date of Meeting of Risk Management Committee	Date of Reporting to Board of Directors on Risk Management Implementation
110.02.22	110.03.23
110.05.11	110.04.29
110.07.12	110.06.24
110.11.18	110.07.23
	110.10.28
	110.12.16

VIII. Information Disclosure

(102-43)

In accordance with the “Corporate Governance Best Practice Principles for TWSE/TPEX Listed Companies”, “Taipei Exchange Procedures for Verification and Disclosure of Material Information of Companies with TPEX Listed Securities”, and relevant laws and regulations, Good Finance discloses relevant information in the online declaration system and discloses various statutory public disclosure matters at the “Market Observation Post Station” to provide real-time information regarding the Company’s finance, business, operation and important resolutions of the Board of Directors in real time as a reference for investors’ decision-making. By holding annual shareholders’ meetings and publicizing monthly revenue, the Company enables investors to understand the Company’s operating conditions, besides honestly exposing penalties and failings so as to enhance information transparency.

IX. Environmental and Social Guidelines

(102-12,102-17,103-2,103-3,205-2,205-3,419-1,FS2)

(I) Prevent money laundering and combat capital terrorism

Money laundering and terrorism financing are severe crimes that endanger social order, national security and even world peace, so they are a major topic of concern to stakeholders. In order to fulfill the financial industry's obligations and responsibilities of preventing money laundering and combating terrorism financing, Good Finance has specially formulated the Risk Assessment of Money Laundering and Terrorism Financing and Related Prevention Policies, the Money Laundering Prevention and Anti-Terrorism Financing Plan and the Operating Procedures for Money Laundering Prevention and Anti-Terrorism Financing as the management approach for preventing money laundering and combating terrorism financing. The Company has also established a complete anti-money laundering and anti-terrorism financing system by assigning designated supervisors and personnel in each business unit and setting up three layers of prevention in concert with the Audit Department. The Company requested the assistance of the PwC Taiwan to complete the 2017 whole institution risk assessment of the year and referenced the national risk assessment reports to grasp the threats and weaknesses faced by the securities and futures sector, to take risk mitigation measures accordingly and to lower the risk of money laundering and terrorism financing. In 2018, the Company established an online customer risk assessment system and conducted enhanced due diligence (EDD) for high-risk customers. Regarding transaction monitoring, our information system shall assist with the detection of suspicious money laundering and terrorism financing. Once dubious transactions are identified and ascertained during the monitoring process, we will immediately report to the Investigation Bureau, Ministry of Justice for further appropriate handling. Further, the Company conducts annual education & training seminars on money laundering prevention. Besides sending our staff to external seminars or hosting in-house trainings, the Company in 2021 invited professional lecturers from the PwC Taiwan Deloitte & Touche to give trainings to our colleagues and the Board of Directors with a view to enhance employees' judgment on money laundering and terrorism financing and build a corporate culture of money laundering prevention through these

trainings. Our management approach has been assessed to have effectively achieved the management objectives and will be constantly reviewed for further improvement.

(II) Insider Trading Prevention

In order to prevent insider trading, the Company has established the “Procedures for Handling Material Inside Information” and strengthened the advocacy & education and control & management of material inside information within the Company. Meanwhile, the stock trading control & management mechanism is also applied to the Company Directors, supervisors and managers to prevent occurrence of insider trading in violation of the Securities and Exchange Act.

(III) Intellectual Property Protection

The Company respects intellectual property rights. The computer software, books and periodicals used by the Company are all legally authorized genuine products. We have always ensured to have obtained legal authorization when using other people or other people’s company information, in a bid to prevent the occurrence of intellectual property rights infringement.

(IV) Environmental Protection Regulations

The Company shall adhere to good faith and abide by the law during the business activities, and shall not engage, for the sake of profits, in anticompetitive, antitrust, or monopolistic conduct that disrupt the commercial order.

(V) Labor Practice and Dignified Labor

The Company establishes employee policies in accordance with the requirements of the Labor Standards Act and complies with various labor regulations and human rights guidelines.

(VI) Social order

The Company shall adhere to good faith and abide by the law during the business activities, and shall not engage, for the sake of profits, in anticompetitive, antitrust, or monopolistic conduct that disrupt the commercial order. (206-1)

(VII) Active Ownership

The Company avoids selecting, for investment targets, enterprises with a record of human rights violations or of evil industries, or for investment portfolios, enterprises that have no active interaction with environmental and social issues. The Company's investment holdings are mostly based on financial investment considerations, and there is currently no voting policy to be applied to environmental and social issues, regarding the use of voting rights or voting proposals acquired from shareholdings. Regarding the Company assets and in response to the risks of environmental and social changes, currently the Company is yet to implement the screening of environmental and social assets and will have separate planning in this regard. (FS10,FS11,FS12)

X. Compliance

(102-12;102-17)

Good Finance has long stayed informed of the development trends of industries at home and abroad, as well as changes in various financial policies and regulations. As we actively develop and expand our business, we also strictly abide by the provisions of related laws and regulations. The Company promulgates and executes all business projects in accordance with the laws and regulations, and effectively manages and controls various legal risks.

For the implementation of legal compliance, besides conforming to various laws and regulations at home and overseas to formulate, update and review our internal guidelines, the Company stipulated the Content and Procedures of Assessment of Legal Compliance in 2007 and has since conducted annual law observance self-assessment to ensure conformity with the provisions of laws and regulations. In addition to the annual education and training on legal compliance for each department, the Legal Compliance Department shall announce, communicate and propagate any regulation updates or amendments, whenever necessary, to keep all departments informed of the latest laws and regulations, while reporting to the Board of Directors and the Audit Committee every six months on matters concerning legal compliance.

To thoroughly follow the provisions of the Foreign Account Tax Compliance Act (FATCA) and prevent our Company and customers from suffering severe losses, the Company appointed a team of consultants in 2014 to carry out planning of responsive measures and was among the

first to complete the FATCA registration in July 2014, thereby openly announcing the Company as a FATCA-compliant financial institution.

XI. Internal Control and Audit System

(419-1,FSS9)

Good Finance has established the internal control system and internal audit procedures in accordance with the Regulations Governing the Establishment of Internal Control Systems by Service Enterprises in Securities and Futures Markets and the Standards and Guidelines Governing the Internal Control System of Securities Dealers (Futures Dealers), and sets up an internal audit unit directly subordinate to the Board of Directors to carry out audit work independently and objectively to provide timely suggestions for improvement and to provide reasonable assurance over the effectiveness of corporate governance, risk management and internal control processes. Our tasks include the establishment and promulgation of the code of practice for the Company sustainable development so as to continue with effective implementation and promotion of the Company's sustainable operation.

The summary of the Company's annual audit of FY 2021 is as follows:

According to the 2021 internal audit plan approved by the Board of Directors, the Audit Department has completed by the end of FY 2021, 244 daily audits, 52 weekly audits, 12 monthly audits, 4 quarterly audits, 2 semi-annual audits and 1 annual audit on securities and futures business areas in accordance with the regulations. In accordance with the regulations, the Audit Department supervises the internal audits of the Company's 11 branch companies, once every six months and a total of 23 times.

Each of the Company's department and branch company should at least once a year conduct a self-assessment which will subsequently be reviewed by the Audit Department. Any internal control deficiencies and anomalies requiring improvement shall be submitted to the Board of Directors and the General Manager to form the main basis for the evaluation of the design and execution effectiveness of the overall internal control system of the Company, and the issuance of the statement of internal control system in accordance with the format prescribed by the governing authority.

The Company's annual audit of FY 2021 reported no major deficiencies. In FY 2021, no penalties or fines were imposed on the Company by any governing authorities. In FY 2021, there were no incidents of the Company employees involved in any violation of the Good Finance Securities Co., Ltd. Procedures for Ethical Management.

XII. Interaction with Governing Authorities and Peer Group

(102-13)

Good Finance shall cooperate with governing authorities in their regular or non-regular inspection and abide by all directions of the governing authorities for the industry businesses. The Company actively interacts with the peer group in the industry. Besides being a member of the Taiwan Securities Association and the Chinese National Futures Association, the General Manager of the Company also serves as a director of the Taiwan Securities Association, actively participating in association affairs and well versed in the industry news and trends able to provide advice to the governing authorities on behalf of the securities industry and improve the industry development. Additionally, Shen Yude, deputy general manager of the Company, serves as a member of the Electronic Business Committee of the Taiwan Securities Association, actively participating in the management of the securities market to promote a more comprehensive and sound market system.

4

Customer Care

Chapter 04 | Customer Care

I. Digital Services, Service Quality and Customer Satisfaction

(203-2,FS5,FS7,FS8,FS14,FS15,FS16)

Good Finance currently has 12 branches to facilitate the handling all customer-related businesses. There is also an electronic trading platform accessible by customers via various devices such as mobile phones and computers for trading and account management of financial commodities such as securities, futures and warrants, of which electronic ordering accounted for 61% in 2021. Of the Company's newly launched asset management product business, our customers in 2021 already had the option of opening a digital account to trade structured commodities, for which 96.3% of the customers opted for an online digital account. This shows that our digital service has greatly reduced account opening time from an average of two days for the paper option to one hour for the online option. Further, each case of digital account opening saves 20 sheets of paper, a total of 37 pages of printed paper.

The Company will continue to build and perfect our digital service processes and integrate current digital services on the strength of various products or business development to truly implement customer-centered services where customers can conduct online trading for our entire product lines on a single integrated digital platform. It's only that customers must undergo the online account opening procedures when they trade with us for the first time. And after that, they only need to complete the necessary transaction procedures for new newly contracted products. The Company provides customers with simple and fast online services, while contributing to the social environment through paperless procedures over time.

II. Safeguarding the Rights and Interests of Customers and Principles for Fair Treatment of Customers

(103-2,103-3,416-1,416-2,417-1,FS3)

In accordance with the "Principle of Fair Hospitality in the Financial Services Industry" as promulgated by the Financial Supervisory Commission, Good Finance has stipulated the "Policy and Strategy Regarding Principles for Fair Treatment of Customers" and the "Handling Procedures for Financial Consumption Disputes". We implement fair treatment of customers

with concrete policies following the following nine principles to protect the rights and interests of the financial consumers: the “Principle of Fairness and Good Faith in Contracting”, the “Principle of Due Care and Fiduciary Duty”, the “Principle of Truthfulness in Advertising Solicitation”, the “Principle of Products or Services Suitability”, the “Principle of Notification and Disclosure”, the “Principle for Sale of Complex and High-Risk Commodities”, the “Principle of Balance between Remuneration and Performance” and the “Principle of Complaints Protection” and the “Principle of Business Personnel Professionality”.

The Company has a comprehensive review of the product specifications and all transaction documents before listing all financial wealth management products. We review, from investors’ perspective, all document design, information notification and disclosure, explanatory statements on risks, rights and interests to ensure that the Company communicates information to investors in a clear, fair and non-misleading manner. Additionally, before customers undertake any commodity transaction, the Company protects the rights and interests of investors by way of the review mechanism of the matching suitability between the customer’s risk tolerance and the product risk (i.e., KYC and KYP).

III. Information Security and Personal Data Protection

(103-2,103-3,418-1)

(I) Information Security

Good Finance adheres to the responsibilities of “Safeguarding the security of the securities market”, “Protecting the rights and interests of investors”, “Enhancing the quality of financial services provided”, and promises to achieve the following information security goals: “Utilizing the information and communication technology to ensure the effectiveness and integrity of the security mechanisms of the securities trading infrastructure”, “Protecting the confidentiality, integrity and availability of the securities and futures trading systems and assets.” And with these goals in mind, we hereby stipulate the internal information security policy.

The Company has set up an “Information Security Committee”, led by Vice Presidents or executive-level officers, along with department heads or designated representatives acting as committee members. The responsibilities of this Committee include promoting, coordinating, supervising and reviewing the

implementation of information security policies and mechanisms, and preventing and responding to the potential cybersecurity incidents, to maintain the security of the information system and to provide customers a safe and reliable securities trading system.

In terms of cyber security intelligence exchange and sharing partnerships, the Company has participated in the cyber security intelligence sharing organization, " Financial Information Sharing and Analysis Center (F-ISAC)", and assessed and taken appropriate action upon alerts issued by the F-ISAC. In addition, the Company has subscribed to the DDoS attack traffic scrubbing services of telecommunications companies, and conducted regular DDoS attack traffic simulation and defense drills. Further, the Company has conducted the annual social engineering attack drills, cyber security incidents response and reporting exercises in conjunction with the Security and Future Computer Emergency Response Team (SF-CERT) for regulatory compliance.

(II) Personal Information Protection

Personal information protection is essential to the safety of the customer data. If managed poorly, it will not only bring risks to customers, but also severely tarnish the Company brand and reputation, so it is a major topic of concern to stakeholders. To protect personal information, the Company has established the "Personal Information Handling and Protection Policies", which clearly stipulates the legitimacy of gathering, using the information and the responsibilities and obligations of Good Finance employees in protecting personal information during business processes. Proper access control is also applied to the core business system to prevent improper use or access to customer data. The Company has also conducted annual inventory on personal information and risk assessment of personal information protection mechanisms to ensure the security of personal information.

To strengthen the employees' awareness of personal information protection, the Company has conducted training on personal information protection for new hires. The contents of training include "Personal Information Protection Regulatory Compliance", "Gathering, Handling and Use of Personal Information" and "Incident Response Procedures for Personal Information Leakage". In

In addition, all Good Finance employees are required to take information security and personal information protection training every year to enhance their capability to respond to information security incidents.

In FY 2021, the Company had no customer petitions concerning customer privacy violation or personal information leakage.

IV. Friendly Financial Services

(102-12)

Good Finance abides by the "Friendly Financial Service Guidelines for Members of the Taiwan Securities Association in a bid to provide a friendly and convenient investment environment for people with physical and mental health conditions and is committed to creating financial services with obstacle-free facilities. Good Finance has set up a "Friendly Financial Service Zone" on the company website to provide various friendly services, including online messaging, email reservation for account opening, a URL link for voice query and online ordering. For persons with disabilities who need to come to our institution counter to handle financial businesses at the counter, the Company will have designated personnel to inform them of all documents needed and assist them with filling in the application documents. Should there be a need for witnessing as required by the law, the Company shall respect the choice of the person with disabilities and offer due assistance. All application documents shall be reviewed from a fair, objective and non-discriminatory standpoint. Also, the Company will provide appropriate personnel service measures and assistance according to individual needs of persons with disabilities and conduct non-regular education and training on the "Friendly Financial Service" for our employees.

V. Service Bases and Channels

(FS13)

To provide customers with convenient services, Good Finance has set up 12 bases across Taiwan, covering the major metropolises, e.g., Taipei, Taichung, Tainan and Kaohsiung, and the Tier-II cities, such as Taishan, Zhongli, Yangmei, and Miaoli, where regional customers enjoy the same quality financial services as those in the metropolises. The Company uses its

operating bases as community service centers to effectively promote regional financial development, expand the reach of financial services, and aim to commit to acting as a friendly neighbor of the local community. We have so far exerted no actual or potential negative impact on the local areas.

Besides the 12 physical service bases, the Company has an online customer service team to provide real-time services by designated personnel. Our services are no longer limited to physical locations. Customers can access our financial services by phone or internet and have their service needs satisfied.

5

Customer Care

Chapter 05 | Employee Care

(103-2,103-3,401-2)

Employees are the most important asset of the company, whose development depends on the hardworking employees, and therefore, the labor-management relationship is a major topic. To promote harmonious labor-management relations, Good Finance provides employees with an ideal welfare system and reasonable salary and remuneration to take sufficient care of the employees so that they can play to their strengths and actualize themselves in a decent working environment, while the Company can continue to grow with sustainable development. Regarding the management approach on labor-management relations and labor relations, the Company has set up statutory organizations, stipulated reasonable regulation-compliant operating guidelines and welfare systems targeting issues like remuneration and welfare, employee education and training, employee health, employee communication, and gender equality, in a bid to reach the management objectives of taking care of employees.

I. Salary and Benefits

(103-2,103-3,401-2)

Good Finance has established an employee welfare committee to take charge of all planning and implementation of various employee welfare matters, besides providing basic guarantees as required by the law. Examples of employee welfare are as follows: organized group tours or tour expense subsidies for bonding; subsidies for funerals, weddings; distribution of gifts on festive occasions; various forms of leave and days off. All work hours are in accordance with or better than the Labor Standards Act. Regarding employees' leave, in addition to the number of days of annual leave in accordance with seniority in accordance with the law, we offer 30 days of half-paid sick leave, maternity leave, paternity examination and paternity leave per year. To implement pandemic prevention measures, we encourage employees to receive COVID-19 vaccination and give employees comprehensive care. On the day of each dose of vaccination, employees can apply for paid pandemic prevention and isolation leave. Should they suffer from adverse reactions caused by vaccination, they may apply for another day of paid pandemic prevention and isolation leave. In addition, if employees need to be isolated at home for being exposed to risks of contracting the virus or having overlapping footprint with confirmed cases, the Company will still pay the employees full salary, as a

gesture to care for the employees and protect their living conditions. Our employee remuneration and benefits are in accordance with the provisions of the law and regulations:

1. Establish the salary and remuneration committee to regularly evaluate whether the Company's remuneration system and the remuneration of personnel ranking above managers or directors are reasonable. The committee shall advise the Board of Directors accordingly.
2. Salaries are paid according to individual conditions: position level, experience & qualifications, and academic performance. Men and women are paid equally for equal work. Bonuses are given according to monthly performance and individual achievements. Annual performance bonuses are awarded based on the Company's incoming profit and individual performance & contribution.
3. The resolution was passed in the shareholders' meeting in 2020 to offer employee restricted stock to attract outstanding talents to join the Company.
4. Establish the Employee Welfare Committee.
5. Provide labor insurance, national health insurance and pension contribution.
6. Formulate employee retirement measures; establish a pension supervision committee; take care of employees' retirement.
7. Produce periodic episodes of internal Podcast: Internal Podcast with chairman, where each employee can raise a question online to the Chairman, and in each episode, there is a theme set aside for company reform planning to keep our colleagues informed of the Company's forward direction.
8. Each employee will receive a birthday voucher on their birthday.
9. Travel allowance/subsidy.
10. Set up a book club for employees to grow and learn together.
11. Stipulate measures for childcare allowance/subsidy; improve benefits for employee childcare benefits; reduce employees' childcare burden.

II. Employee Education and Training

(103-2,103-3,404-1,FS4)

The quality and professionalism of our employees will affect the quality of customer service, and therefore, education & training is a major topic. The Company has stipulated the Education and Training Management Measures as the administrative policy. Besides

conducting onboarding training and on-the-job training as required by the governing authority, we have planned various specialized training and management training. Training could take place on-site and off-site to give our employees systematic and professional training. Through all kinds of learning resources, our employees will acquire the necessary attitude, knowledge and skillsets to effectively perform the Company tasks in a bid to raise their specialized capabilities and business performance. The effectiveness of the implementation of the management approach can be evaluated and determined by whether the employees have their work performance improved after receiving relevant training. Such training outcome will be used as the basis for adjusting the management approach. The outcomes of various education and training courses are as follows:

Good Finance Employee Training

Project	Course Name	Number of Classes	Total Number of People	Total Hours	Total Cost

Employee education & training activities

III. Enhancement of employee health

(103-2,401-2,403-4)

Employees are important assets of the company, and healthy employees can make more contributions to the Company. To maintain the employees' health, in addition to the statutory "National Health Insurance", the Company also organizes group insurance for employees in a bid to provide them with more medical protection. "Early detection, early treatment" is a proactive approach to prevention. Since 2004 we have been offering each employee one free health examination every 3 years, so that employees can detect an abnormal health condition at its early stage and proceed with necessary medical treatment to avoid health deterioration.

Previously, only the items as required on the Occupational Safety and Health Act (formerly the Labor Safety and Health Act) were carried out for the health examination, which now has been gradually extended and adjusted to better take care of the employee health and obtain a more detailed check-up result. The Company also appoints medical personnel in accordance with the Occupational Safety and Health Act to offer on-site labor health services. For instance, monthly health information sharing are held to discuss and identify workplace hazards, as well as promoting the four major plans of workplace health, including maternal protection, abnormal load, Ergonomic hazards and unlawful workplace infringement, with a view to provide a safe and healthy working environment for employees.

Health information sharing: COVID-19 vaccines. / Health information sharing: gout and hyperuricemia.

IV. Employee Communication

(102-43)

The Company regularly and irregularly holds various meetings and take measures to establish a variety of communication channels, so that the opinions or suggestions of employees can be fully reflected, and communication with the Company is unobstructed in order for employees to uphold or strive for their own rights and interests. Primary communication channels are as follows:

- (I) Internal Podcast with chairman and brokerage business meetings
- (II) Hold regular labor meetings
- (III) Hold interchange meetings between employees and supervisors on a non-regular basis
- (IV) Conduct annual performance appraisal
- (V) Set up a general manager's mailbox.
- (VI) Install a physical bulletin board.

V. Respect Human Rights

(102-11,102-41,103-2,103-3,401-1,401-2,401-3,402-1,406-1,407-1, 409-1,411-1,412-1)

All of Good Finance's business operation is handled in compliance with government laws and regulations and adheres to Taiwan's human rights regulations. The Company supports and respects internationally recognized human rights and equality and does not discriminate against employees because of their gender, religion and race regarding recruitment, performance appraisal and remuneration.

Harmonious labor-management relations are the cornerstone of a company's development. In accordance with the Labor Standards Act, we have stipulated work guidelines and clearly defined the rights and obligations of both labor and management. Employees receive overtime pay for their overtime work based on the regulations of the Labor Standards Act. There are no incidents of forced or compulsory labor incident. Full salary and notice are given to employees who are not fit for the appointment. There were no labor disputes reported in FY 2021. There were no complaints of human rights or violations of the indigenous people's rights in FY 2021.

The Company respects gender equality. Sexual harassment prevention measures and disciplinary guidelines have been stipulated. Complaints will be handled by designated personnel to safeguard the basic rights and interests of employees. There were no sexual harassment complaints in FY 2021.

VI. Female employee care

(401-3)

To take care of female employees, the Company grants maternity leave and parental leave, and paternity leave to male workers too as a gesture to encourage employees to raise their next generation and ease the pressure of Taiwan's aging population. Lactation room is provided in the workplace, and female employees are given sufficient time to pump or nurse to meet the needs of baby care.

Employee reinstatement and retention ratio after parental leave in FY 2021

Project	Female	Male	Total
Total number of employees who were purported to return to work in FY 2021 after parental leave (A)	3	0	3
Total number of employees who returned to work in FY 2021 after parental leave (B).	2	0	2
Reinstatement Rate	66.67	0	66.67
Total number of employees who returned to work in FY 2020 after parental leave (C).	1	0	1
Total number of employees who remained in service 12 months after reinstatement in FY 2020 (D)	1	0	1
Retention Rate	100.00		100.00

Note: Reinstatement Rate = (B/A)×100; Retention Rate = (D/C)×100.

VII. Recruitment and Diversity

(102-8,103-2,103-3,405-1)

The enterprise development relies on employees contributing their talents. The employee quality is a decisive factor to the company competitiveness, so recruitment is a major topic of concern to stakeholders. The Company's management approach for recruiting employees is to recruit full-time employees instead of temporary workers. Recruiting has diversified and its main considerations are: the education and experience required for the job, professional skills, and personality traits. Currently we are not recruiting temporary workers. The evaluation of the management approach shows that Good Finance's recruitment outcomes thoroughly meet the Company development needs. The Company employee number, gender distribution, annual average expenses for welfare, average age, average years of service and education distribution ratio are shown in the table below:

FY		2022	2022
Employee number	Managers	42	34
	Regular employees	293	352
	Total	335	386
Gender	Male	89	123
	Female	246	263
Average age		48.46	45.8
Average years of service		19.81	15.3
Academic qualification distribution	Doctor	0.00%	0.00%
	Master	9.25%	10.62%
	College	69.85%	72.80%
	High school	20.00%	16.32%
	High school or less	0.90%	0.26%
	Total	100.00%	100.00%

FY	2022	2022	Gap
Average annual expenditure for employee benefits	\$1,146,000	\$1,559,000	\$413,000
Average annual expenditure for non-manager employee benefits	\$796,000	\$1,161,000	\$365,000

FY	2021	2022	Gap
Number of non-supervisors	287	326	39
Average annual salary of non-supervisors	\$788,000	\$1,161,143	\$373,143
Weighted average number of non-supervisors	275	313	38
Median	\$670,355	\$963,043	\$292,688

FY 2021 Ratio of standard wage at entry level and local minimum wage (202-1)

Gender	Standard wage at entry level	Local minimum wage	Ratio
Male	26,800	24,000	1.12
Female	26,800	24,000	1.12

FY 2021 full-time employees by gender, age group and management level

Gender	Female			Subtotal
	Under 30 years old	30-50 years old	Over 51 years old (including 51)	
Managerial positions	0	9	11	20
Non-managerial positions	19	132	92	243
Total	19	141	103	263

Gender	Male			Subtotal
	Under 30 years old	30-50 years old	Over 51 years old (including 51)	
Managerial positions	0	6	8	14
Non-managerial positions	15	59	35	109
Total	15	65	43	123

Note: Managerial positions refer to the management and above. The ratio of female managers to all managers: 58.82%

VIII. Occupational Health and Safety

All operating bases of Good Finance comply with local government laws and regulations and regularly conduct safety inspections on firefighting equipment to ensure employee safety in the workplace. The Company is committed to improving the working environment in accordance with the Occupational Safety and Health Act. Since 2001, the Company's partitions have switched to gypsum boards and calcium silicate boards and no longer uses square lumber for the partition frame. The counter has also switched from wood to OA office furniture. Storage cabinets are either changed to iron cabinets or fireproof polymer panels to directly or indirectly greatly reduce the use of wood. Light steel frames for ceilings are gradually changed to calcium silicate boards to reduce dust.

Statistics of occupational hazards in FY 2021 (403-2)

Percentage of deaths caused by occupational injuries	0

Environmental Protection

Chapter 06 | Environmental Protection

(103-2,103-3,201-2,203-2,305-5)

Good Finance is in the financial service industry, and its business operation has less damage to the environment, the primary source of greenhouse gas emissions is the energy consumed in running the workplace. To proactively echo with the Paris Agreement that sets the goal of limiting global warming to well below 1.5°C and achieving net zero emissions by 2050, the Company has the duty and obligation to respond with action regarding climate change.

Climate change is a risk as well as an opportunity. Reducing greenhouse gas emissions is a core issue in evaluating the Company's management of climate impact, while affecting economic performance and long-term sustainable development. As such, Good Finance is committed to seeking ways of reducing carbon emissions throughout our business operations. We adopt energy-saving thinking and improvement practices in various services and operational processes, committed to promoting a green workplace and providing a high-quality office environment for employees. The aim is not only to boost the Company operating performance, but also to provide customers with better service quality.

I. Space experiment plan: Taipei Branch

(103-2, 103-3, 302-1, 302-4, 302-5, 308-1, FS8)

Garbage classification has been implemented in Taiwan since 2006, and the overall resource recovery rate has reached 53.28% so far, ranking third in the world, but the recycled material ratio is only 4.89%. Good Finance in 2021 launched a space experiment program, inviting MINIWIZ for collaboration, which specializes in material development, to explore ideas about humans and space, finance, and the society, centering on sustainable development design. Notably in a 2022 article featuring a special report on zero waste covered by The Economist, a UK-based authoritative global financial media, Good Finance was mentioned for its Taipei head office renovation with a space experiment plan that utilizes a building method that has least environmental impact and creates a space, themed on stable aesthetics, featuring both practicality and a warm supple texture.

(I) Design concept

Spatial transformation is not merely to dispense with old hardware, but to study user experience and explore better options for the future. To this end, Good Finance's Innovation Director, Shen-Chun Lo, has joined the founder of MINIWIZ, Chian-Chi Huang, in multiple meetings exploring the feasibility of sustainability practice execution in various disciplines to propose practical and aesthetic projects for an ideal life.

Good Finance Space Experimental Plan Part 2: Taipei Head Quarters Meeting Room.

(II) Material application

Utilize a high proportion of recycled materials for space materials. The cost of recycled materials was up to NTD1,000,507. Mostly basic geometric shapes are in place, softening the sharp edges and corners into elegant turns, giving the space a sense of stability and settledness.

1. Wall ceiling PlyFix: Recycled PET (e.g., plastic bottles) is combined with the fiber coating and hot-pressed, without the use of any adhesives, to mold into waterproof, breathable, soundproof modules that are also used in NIKE's New York and Tokyo offices. At Good Finance's Taipei Headquarters, the use of PlyFix extends from the entrance to the curved surface of the wall, bringing a warm touch to the space. Its overall design and use of building materials has overcome existing structural problems such as height limitations, noise and echoes that cannot be absorbed.

2. Polli-Ber Bricks for partition walls: Discarded discs, lamp shades, and high-capacity water bottles (PCs) are recycled and turned into high-strength, durable objects that reduce original lifecycle carbon emissions by 40%, plus UV-resistant and flame-retardant ratings. The translucent brick walls reduce the sense of oppression and connect the inner and outer spaces with soft light, allowing customers and visitors to enjoy a cozy, friendly and private space.
3. Recycled glass for the meeting room tables: 40% recycled is mixed, reproduced and designed with special printing techniques to render 2-3 mm marble lines below the surface. The finished product has the look of natural marbles in its layered patterns.

Material applications

Recycled glass

PlyFix

rPET

Polli-Ber Brick

rPP

Material applications

(III) Sustainability conversion in material coverage area of 180 square meters:

1. Carbon emissions: Reduce as much carbon emission as absorbed by about 1,315 trees per year.
2. Air pollution: Reduce as much sulfur dioxide as emitted by Taichung Power Plant for 60 minutes
3. Water pollution: Reduce as much oxidation as in about 450 swimming pools

HQ lobby Impact Equivalent

180 sqm X **80 kg/sqm** = **14,400 kg** CO₂
Total Area CO₂ reduced per sqm CO₂ reduced total

14,400 kg ÷ **10.95 kg/tree/year** = **1,315 Tree/year**
CO₂ reduced total CO₂ Captured per tree in a year

180 sqm X **7.8 kg/sqm** = **1,404 kg** SO₂ = **60 mins**
Total Area SO₂ reduced per sqm SO₂ reduced total
 Taichung Fire Power Station

180 sqm X **2.2 kg/sqm** = **396 kg** N
Total Area N reduced per sqm N reduced total
 Avoiding 450 Eutrophic
396000 g N / 2.5 g/m³/20 = 158400 m³ = 450 swimming pool

II. Legal Compliance

Good Finance complies with various environmental laws and regulations and has not been punished with hefty fines or sanctions other than fines for violating environmental laws and regulations. Good Finance is in the financial services industry and is not involved in raw materials transportation related issues.

III. Paper reduction

(103-2,103-3)

To protect forest resources on the earth, the Company is seeking ways of reducing the use of paper in business operations from customer services to internal administration. For example, our "Customer Bank Statement" has switched from manual printing to "Electronic Statement". We have replaced traditional paper document signing with "Online account opening"; internal document signing, employee leave taking with "Electronic signing" and "Electronic leave taking", as well as promoting "e-Financial statements". All above measures are in place to reduce paper consumption and postal/telecommunication costs and manpower.

In addition, we have turned our document storage into electronic files, wherever possible, to reduce paper archives. We resort to double-sided printing or use recycled paper for photocopy. We tone down the photocopier toner concentration to make it last longer and avoid waste of paper and toner. We promote paperless and electronic documentation for internal administration and minimize use to the minimum. This is our key task in the topic of environmental protection topic.

IV. Management of energy use

(103-2,103-3,302-1,302-4,302-5)

Good Finance is in the financial services industry, does not manufacture physical products and is not involved in energy consumption related issues. The maximum power consumption of the Company's operating sites is from air conditioning, computer equipment and lighting, for which energy-conserving products have been introduced gradually. For illumination, we have switched the traditional T-BAR fluorescent fixture to high-power T5 fluorescent lamps. In recent years, we have successively brought in more energy-saving LED lamps. All CRT TV walls in the Company for pricing display have been substituted by LED TV walls. The Company's procurement principles require us to seek out equipment that complies with the specifications of energy-saving products wherever possible, and plan to replace the old with the original power-consuming equipment. The air-conditioning system used by the Company will be replaced by the Grade-I energy efficient equipment in the annual budget.

The Company's efforts to save energy and electricity have produced positive results with a reduction of 41% in electricity consumption in 2021 compared to 2014. The cumulative electricity bills saved over the years are an equivalent of 476,426 kg in CO₂ emissions. In 2021, due to our substantial business growth, the electricity consumption increased by 26,747 kWh compared with 2020. The Company energy consumption statistics in recent years are as follows:

FY	Annual electricity fee	Compared with the previous year	Reduction of electricity consumption	Reduction of CO ₂ emissions (KG)
2014	\$10,187,000			
2015	\$9,845,000	-\$342,000	64,000	35,000
2016	\$8,290,000	-\$1,555,000	293,000	161,000
2017	\$7,541,000	-\$749,000	154,000	85,000
2018	\$6,677,000	-\$864,000	171,000	94,000

FY	Annual electricity fee	Compared with the previous year	Reduction of electricity consumption	Reduction of CO2 emissions (KG)
2019	\$6,110,000	-\$567,000	112,000	62,000
2020	\$5,872,000	-\$238,000	47,000	26,000
2021	\$5,969,000	\$97,000	-26,747	13,426

V. Procurement Practices

(102-9,204-1,308-1)

Good Finance is not in the manufacturing industry, has no specific supply chain manufacturers and therefore is not involved in issues related to no raw material procurement. We generally handle our procurement of our office supplies with local suppliers wherever possible and avoid the use of imported goods to prevent unnecessary transportation energy consumption and excess carbon emissions. Such practice is a friendly gesture to the environment.

VI. Emissions

(305-5,305-6)

Good Finance is in financial services industry, does not need burn fuels like the manufacturing industry, produces no direct greenhouse gas emissions, no ozone layer destruction substance emissions, and no other distinct gas emissions like nitrogen oxides and sulfur oxides. Only indirect greenhouse gas emissions are generated in our Company premises by the use of office equipment, computers, illumination and air conditioning. Besides continuously advocating the conservation of electricity, the Company also increases the temperature setting of air conditioning in response to the governing authorities' energy conservation campaign and encourages our colleagues to turn off the light after use, take more stairs, and remove unnecessary electrical power supplies. Through annual budgeting we are gradually replacing old energy-consuming electrical equipment and try to procure new equipment with Grade-I energy efficient products to reduce electricity energy consumption. The Company has a total of 12 operating sites across the country, mostly

located in easily accessible metropolises. To reduce CO2 emissions generated from vehicles, we encourage employees to take public transportation to commute to/from work and reduce the use of scooters and cars for less impact on the environment.VII. Water resources management

VII. Water resources management

(303-3)

Good Finance is not in the manufacturing industry and is not involved in issues related to large quantities of water resources consumption. Our water is from the water company for regular non-industrial use and draw no water from underground or other water sources. After use, the water is directly discharged into the sewer, not recycled for further use. Taiwan has scarce water resources. We take great care in our water use, often advocates/educates our colleagues to save water, reduce water waste, and contribute to environmental protection.

VIII. Waste management

(306-2)

Good Finance installs recycling bins in office premises for recyclable waste such as wastepaper, tins and cans, plastic bottles to implement waste reduction policies.

7

Social Participation

Chapter 07 | Social Participation

Good Finance hopes to establish a connection with the local community and social welfare groups through the process of social participation, and to fulfill our corporate social responsibility through long-term social care activities to lay the foundation for the sustainable development of the Company. The primary tasks are as follows:

I. Charity

(413-1)

Good Finance has a total of 12 operating sites across the country. We interact proactively with local communities and take part in community events, care for local villagers, understand the expectations and needs of local residents and provide services whenever possible. We hope to integrate into local communities by way of interaction between each branch company and the local community to contribute to the local community and fulfill our social responsibility. In response to the campaign, "Invoice Donation for the Bedridden", the Company collects monthly invoices to donate to the Genesis Social Welfare Foundation and the winning prizes will be used as a care fund for those in a vegetative state. A total of 95,606 invoices has been collected (from 2015/01/01 to 2021/12/31). In addition, the Company colleagues have also donated blood in response to blood donation campaigns to help those in need.

Our Taichung colleagues engaged in blood donation campaign

II. Response to environmental protection

Good Finance cares about our environments. Our colleagues spend their holidays on public welfare activities such as street/mountain/beach tidy-up and contribute to the protection of mountains and rivers.

Our Yangmei colleagues engaged in mountain clean-up campaign

Our Kaohsiung colleagues engaged in park clean-up

III. Enterprise volunteers

To fulfill our corporate social responsibility and promote the "One-Day Volunteer" campaign, we encourage all employees to participate in social welfare activities by granting them special leave. We hope to cultivate a corporate culture of "Kindness is the highest form of happiness" to plant the seed of compassion in employees and do what we can to help those in need.

IV. Promoting financial education

(FS14,FS16)

Between 2021 and today, Good Finance has hosted 10 seminars on campus and in bookstores all over Taiwan with over 1,000 participants in total, nearly 40% of whom were students. On May 7, 2021, we hosted a joint lecture on campus together with the Securities Research Institute of National Taiwan University where the Daqing Securities' value investment adviser, Frank, and content executive, Kurt Lin, were invited to share their financial knowledge. Kurt Lin was also invited to speak at the Magazine Festival addressing the role of finance in the sustainability industry. Magazine Festival is a sustainable financial event co-organized by our partner organizations, namely, Media Business Association of Taipei and ImpactHub.

The Company has also invested in financial education, propagating and making financial knowledge, management and sustainability accessible and understandable to the general public. Over the past year, the Company first converted the internal publication *Daqing Bi-Monthly Journal* into a magazine circulated on the market, *1611*, with an initial sale of 3,000 copies. We gradually expand our magazine sales beyond Taiwan to cover bookstores in Malaysia, Hong Kong, Japan and London. As we strengthen our international ties, we are also spreading Taiwan's thoughts on modern society to the world. Good Finance will continue to invest in finance, sustainable business knowledge popularization, and transmit more positive circular influence in Taiwan and overseas in more approaches and languages.

Financial sustainable impact forum, Impact Hub Taipei

V. Industry-Academia Collaboration

To cooperate with the government's industry-academia collaboration policy and help university students of finance related departments, Good Finance has been working with the following universities since 2006: National Taiwan University, National Cheng Kung University, Chang Gung University, St. John's University of Science and Technology, Lunghwa University of Science and Technology, and Taipei University of Commerce to provide internship opportunities for students to better understand the securities industry through practical learning which can be a reference for choosing a future career. Between 2015 and today, the Company has hired two outstanding interns as our full-time employees.

I. Accountant Limited Assurance Report

會計師有限確信報告

資會綜字第 21020511 號

美好證券股份有限公司 公鑒：

本事務所受美好證券股份有限公司（以下稱「貴公司」）之委任，對 貴公司選定 2021 年度永續報告書所報導之績效指標執行確信程序。本會計師業已確信竣事，並依據結果出具有限確信報告。

確信標的資訊與適用基準

有關 貴公司選定 2021 年度永續報告書所報導之績效指標（以下稱「確信標的資訊」）及其適用基準詳列於 貴公司 2021 年度永續報告書第 57 頁之「確信項目彙總表」。前述確信標的資訊之報導範圍業於永續報告書第 1 頁之「報告書邊界與範疇」段落述明。

上開適用基準係為財團法人中華民國證券櫃檯買賣中心「上櫃公司編製與申報永續報告書作業辦法」與相關問答集及有關法令之規定，以及 貴公司依行業特性與其報導之績效指標參採或自行設計其他基準。

管理階層之責任

貴公司管理階層之責任係依照財團法人中華民國證券櫃檯買賣中心「上櫃公司編製與申報永續報告書作業辦法」與相關問答集及有關法令之規定，以及 貴公司依行業特性與其報導之績效指標參採或自行設計其他基準，以編製永續報告書所報導之績效指標，且維持與績效指標編製有關之必要內部控制，以確保績效指標未存有導因於舞弊或錯誤之重大不實表達。

會計師之責任

本會計師係依照確信準則公報第一號「非屬歷史性財務資訊查核或核閱之確信案件」，對確信標的資訊執行確信工作，以發現前述資訊在所有重大方面是否有未依適用基準編製而須作修正之情事，並出具有限確信報告。

本會計師依照上述準則所執行之有限確信工作，包括辨認確信標的資訊可能發生重大不實表達之領域，以及針對前述領域設計及執行程序。因有限確信案件取得之確信程度明顯低於合理確信案件取得者，就有限確信案件所執行程序之性質及時間與適用於合理確信案件者不同，其範圍亦較小。

本會計師係依據所辨認之風險領域及重大性以決定實際執行確信工作之範圍，並依據本委任案件之特定情況設計及執行下列確信程序：

資誠聯合會計師事務所 PricewaterhouseCoopers, Taiwan
110208 臺北市信義區基隆路一段 333 號 27 樓
27F, No. 333, Sec. 1, Keelung Rd., Xinyi Dist., Taipei 110208, Taiwan
T: +886 (2) 2729 6666, F: +886 (2) 2729 6686, www.pwc.tw

- 對參與編製確信標的資訊之相關人員進行訪談，以瞭解編製前述資訊之流程、所應用之資訊系統，以及攸關之內部控制，以辨認重大不實表達之領域。
- 基於對上述事項之瞭解及所辨認之領域，對確信標的資訊選取樣本進行包括查詢、觀察、檢查及重新執行等測試，以取得有限確信之證據。

此報告不對 2021 年度永續報告書整體及其相關內部控制設計或執行之有效性提供任何確信，另外，2021 年度永續報告書中屬 2021 年 12 月 31 日及更早期間之資訊未經本會計師確信。

會計師之獨立性及品質管制規範

本會計師及本事務所已遵循會計師職業道德規範中有關獨立性及其他道德規範之規定，該規範之基本原則為正直、公正客觀、專業能力及盡專業上應有之注意、保密及專業態度。

本事務所適用審計準則公報第四十六號「會計師事務所之品質管制」，因此維持完備之品質管制制度，包含與遵循職業道德規範、專業準則及所適用法令相關之書面政策及程序。

先天限制

本案諸多確信項目涉及非財務資訊，相較於財務資訊之確信受有更多先天性之限制。對於資料之相關性、重大性及正確性等之質性解釋，則更取決於個別之假設與判斷。

有限確信結論

依據所執行之程序與所獲取之證據，本會計師並未發現確信標的資訊在所有重大方面有未依財團法人中華民國證券櫃檯買賣中心「上櫃公司編製與申報永續報告書作業辦法」與相關問答集及有關法令之規定，以及 貴公司依行業特性與其報導之績效指標參採或自行設計其他基準編製而須作修正之情事。

其它事項

貴公司網站之維護係 貴公司管理階層之責任，對於確信報告於 貴公司網站公告後任何確信標的資訊或適用基準之變更，本會計師將不負就該等資訊重新執行確信工作之責任。
